ALUMINUM COVERS

AND FLAT PANEL ROOFS

UIG **GEO-TRUSS, CLEAR SPAN COVERS** and **FLAT PANEL ROOFS** are specifically designed and engineered for very large storage tanks that are square, rectangular or irregular in shape.

They are ideal for covering concrete reservoirs, ponds or other in-ground storage tanks.

As with UIG's Geodesic Domes, these covers are strong, lightweight and virtually maintenance free. They do not corrode and do not require painting. They are designed and fabricated for a precision fit in the field.

High quality new aluminum material to fit your storage tank to protect the contents of your tank and control the odor.

Aluminum Tank Covers can be self-supported, high, low profile and flat to accommodate your requirements at very competitive price.

Aluminum Tank Covers are designed and fabricated to your specifications and international standards and offer full line of ladders, handrails, skylights, doors, dormers, walkways, etc...
