

# United Industries Group, Inc. Experience

**Design ■ Engineering ■ Fabrication ■ Field Erection  
Project Management ■ Material and Equipment Supply**

Established since 1969, United Industries Group, Inc. working with US Air Force, Navy, and Major International corporations including the U.S. Army Corps of Engineers as a General Contractor in the USA and as a Subcontractor throughout the world including war zone areas Afghanistan and Iraq.

UIG understands high demands, complexity of the submittal and approval process, safety requirements, and other resources required to achieve successful completion of major military projects on time and up to expectation, requirements and standards of COE from both GC and Subcontractor perspectives.

Organization and teamwork is UIG's credo. This philosophy propels UIG to excel in project management starting with the bidding stage of the project, well-planned kickoff meeting and during all stages of the project logistics until its successful completion and acceptance by the client.

*Additional information on completed projects are available upon request.*
