

# Stainless Steel Bolted Storage Tank Solutions

## UIG provides the perfect storage tank solution for your projects

- Stainless Steel is durable, resistant to corrosion, attractive and easy to work with.
- Precision engineering results in perfectly matched panels for safe, dependable storage.
- Build low and wide or high and narrow, nearly any configuration necessary to meet specific capacity requirements.
- May be installed on the ground, on elevated platforms or towers or inside existing buildings.
- Flexible capacity: tank size can be increased or decreased by adding or removing a complete ring of panels.
- Dismantling for relocation is simple. Damaged parts may be easily removed and replaced.
- Tank bottom may be flat or cone and can be manufactured from either 304 or 316 stainless steel.
- The steel is recyclable, having little impact on the environment.
- Manufactured to AWWA, NRCS, ACI and other agricultural standards. SCS approved and meets standards for both potable and non-potable water and waste liquids.
