

EVERSTORE®

GLASS-FUSED-TO-STEEL BOLTED STORAGE TANKS

Water Storage Solutions that last

UIG **EVERSTORE®** Glass-Fused-To-Steel Bolted Tanks are created through the fusion of two materials to achieve the best properties of both - the strength of titanium-rich steel and the corrosion resistance of our highly flexible and damage-resistant enameled surface.

Fused at temperatures exceeding 1600° F, UIG's panels form a new, chemically inert surface that is

stronger than steel alone and resistant to rust, corrosion, abrasion and stains. In addition, UIG's proprietary **EVERSTORE®** coatings are engineered from pH 2 to pH 13 to meet the specific needs of your application.

Pair with our UIG **EVERDOME®** Aluminum Geodesic Dome Covers for virtually maintenance-free storage.

FAST PRODUCTION AND SHIPPING ON ALL UIG BOLTED TANKS

UIG BOLTED TANKS ARE BUILT TO LAST

UIG is the industry leader in product and process innovation. We design, manufacture and install the highest quality tank storage solutions on the market.

FAST PRODUCTION & INSTALLATION

UIG bolted tanks and domes are designed and manufactured fast in our facilities for quick shipment to your jobsite.

ALL UIG INSTALLERS ARE CERTIFIED

All UIG field personnel are rigorously tested and certified for top tier performance and quality.

READY TO DELIVER ON YOUR SCHEDULE

UIG installation & project management teams provide superior white glove service and ensure timely delivery.

UIG TANKS

UNITED INDUSTRIES GROUP, INC.

Why you should work with our team on your next project

- ✓ We deliver projects quickly
- ✓ We're creative problem solvers
- ✓ We have 55+ years of experience
- ✓ We adhere to the highest standards

Since 1969, United Industries Group, Inc. (UIG Tanks) has been the global leader in aboveground storage tanks, aluminum dome roofs & reservoir covers. Our commitment to excellence shines through our **EVERSTORE®** Glass-Fused-to-Steel Bolted Tanks, **EVERSTEEL™** Stainless Steel Bolted Tanks & **EVERDOME®** Aluminum Geodesic Domes.

EVERSTORE®

GLASS-FUSED-TO-STEEL BOLTED STORAGE TANKS

BENEFITS OF UIG EVERSTORE® GLASS FUSED- TO-STEEL BOLTED TANKS

UNMATCHED QUALITY:

- **TITANIUM-RICH STEEL (TRS™)**: UIG tanks are made from Titanium-Rich Steel specifically developed for enameling applications to provide superior tensile strength, flexibility, and adhesion.
- **FACTORY CUT OPENINGS**: All tank openings, nozzles and bolt holes are laser-cut at the factory prior to the enameling process to ensure accurate fit and a quality finish.
- **INNOVATIVE PLATE EDGES**: Rounded edges on UIG's TRS™ plates allow for full encapsulation, ensuring maximum corrosion protection and tank longevity.
- **CUSTOM GLASS COATINGS**: UIG enamel frits are tailored for your application offering exceptional corrosion resistance from pH levels 2-13 and a wide spectrum of custom colors.
- **PRECISION ENAMELING**: We've perfected the wet spraying process to ensure uniform, durable application on all sheet surfaces and edges.
- **RIGOROUS TESTING**: Every finished panel undergoes comprehensive testing at the factory, adhering to the latest AWWA D103 standards and international requirements.
- **UNMATCHED DURABILITY**: Engineered to withstand harsh environments, UIG EVERSTORE® Glass-Fused-to-Steel Tanks offer superior corrosion resistance and ensure a longer lifespan vs. epoxy coated tanks.

VERSATILE & COST-EFFECTIVE:

- **EFFICIENT INSTALLATION**: Bolted tank design allows for quick and easy on-site assembly, reducing construction time and labor costs compared to welded tanks.
- **LOW MAINTENANCE**: With their enameled surface, UIG EVERSTORE® Tanks require minimal upkeep, leading to long-term savings and reduced operational disruptions.
- **MULTIPLE APPLICATIONS**: Ideal for water, wastewater and industrial storage. UIG EVERSTORE® Tanks serve a wide range of industries including municipal, agriculture and manufacturing.
- **SCALABLE & EXPANDABLE**: The modular design allows for easy expansion or relocation, providing flexibility as your storage needs evolve.

INDUSTRY EXPERTISE:

- **DESIGN AND ENGINEERING**: UIG engineers are licensed in all 50 states. Every UIG EVERSTORE® tank includes PE stamped submittals and tank foundation design.
- **STANDARDS COMPLIANCE**: Our tanks meet AWWA, API, NSF 61, NFPA, IBC, EPA, DIN, ISO, ASTM, OSHA, UBC Seismic, and other standards.
- **TRUSTED SOLUTION**: For over 55 years UIG has been focused on earning the trust of engineers, contractors and facility owners worldwide with skillful design and efficient installation on 1,000+ tank projects.
