

# EVERDOME®

ALUMINUM GEODESIC DOMES & RESERVOIR COVERS

## Custom covers engineered to protect and built to last

UIG EVERDOME® aluminum geodesic domes and custom reservoir covers provide the ultimate coverage solution for a wide spectrum of tank storage applications.

Constructed of commercial grade aluminum - EVERDOME® is highly corrosion-resistant eliminating the need for coating/painting for the life of the structure.

With its self-supporting design, EVERDOME is the ideal cover solution for bolted, welded, and concrete tank projects - both new and retrofits.

EVERDOME® Clear Span Flat Panel Roofs are also available in square, rectangular and custom configurations. Capable of efficiently and securely spanning long distances, they are an ideal solution for large-scale reservoirs.

Available in any profile (low, medium or high), EVERDOME® is the perfect cover for potable water, wastewater, process water and odor control applications.

Pair with our UIG EVERSTORE® Glass-Fused-To-Steel or ELITESTORE™ Stainless-Steel bolted tanks for virtually maintenance-free storage.

## FAST PRODUCTION AND SHIPPING ON EVERDOME® TANK COVERS

### EVERDOME® COVERS ARE MADE TO LAST

- Built with commercial-grade aluminum
- They're durable and corrosion resistant
- Will never require painting or coating

### CERTIFIED UIG DESIGN & CONSTRUCTION

- AWWA D108 design committee Member
- Engineers are licensed in all 50 states & Canada
- UIG construction teams are tested and certified

### FAST PRODUCTION & DELIVERY

- State-of-the art production facility
- Industry-leading turnaround speeds
- Quick shipment to your job site

### READY TO INSTALL ON YOUR SCHEDULE

- Dedicated project management teams
- Superior white glove service and support
- Seamless coordination & clear communication

## INDUSTRIES EVERDOME® SERVES

- **Hyperscale Data Centers:** Cooling water makeup and fire water tank system covers
- **Municipal & Government Agencies:** Covers for safe and reliable potable water storage
- **Food & Beverage Processing:** Hygienic cover solutions for production facilities
- **Energy & Utilities:** Secure storage for process water and wastewater treatment
- **Military & Defense:** Durable solutions for a wide spectrum of critical infrastructure
- **International Organizations:** Supporting global water initiatives around the world

## THE UIG TANK SYSTEMS DIFFERENCE

- ✓ UIG in-house engineering teams are experts in tank, foundation & piping design
- ✓ Certified UIG construction teams deliver with precision, quality and efficiency
- ✓ End-to-end project management ensures a streamlined, hassle-free experience
- ✓ A proven track record rooted in consistent performance over the last 55+ years

ALUMINUM GEODESIC DOMES & RESERVOIR COVERS

## BENEFITS OF UIG EVERDOME® ALUMINUM GEODESIC DOMES & COVERS

### UNMATCHED QUALITY:

- **COMMERCIAL GRADE ALUMINUM:** UIG domes and covers are made with commercial grade aluminum. They're lightweight, strong, and highly resistant to corrosion.
- **UNMATCHED DURABILITY:** UIG EVERDOME® covers will not rust like painted or galvanized carbon steel and will not degrade like fiberglass ensuring a longer product lifespan.
- **RIGOROUS TESTING:** Every EVERDOME® component undergoes comprehensive factory testing, adhering to the latest AWWA D108, API 650, and applicable international standards.
- **LOW MAINTENANCE COST:** EVERDOME® does not require any coating or future re-coating. It's a virtually maintenance-free solution.

### VERSATILE & COST-EFFECTIVE:

- **MULTIPLE APPLICATIONS:** UIG EVERDOME® serves a wide range of applications from potable water, to wastewater, process water and more.
- **CUSTOM ACCESSORIES:** Designed to meet your needs, EVERDOME® offers a full line of high-quality accessories from ladders, to handrails, walkways, skylights, doors, dormers, hatches and connections.
- **DESIGN FLEXIBILITY:** In addition to round covers, UIG can easily design square, rectangular, octagonal, trapezoidal or other custom shapes.
- **EFFICIENT INSTALLATION:** The self-supporting design and lightweight components allow for quick and easy on-site assembly, significantly reducing construction time and labor costs.
- **ODOR CONTROL:** Fabricated for a precise fit, EVERDOME® is designed to control odor for wastewater treatment, agricultural, and food processing applications.
- **SELF-SUPPORTING:** The self-supporting design allows for maximum overhead space utilization and interference-free operation for floating roofs and other internals.
- **RETROFITS:** UIG EVERDOME® can easily be installed over existing tanks and reservoirs, greatly decreasing the costs to add or replace a cover.

### INDUSTRY EXPERTISE:

- **DESIGN AND ENGINEERING:** UIG engineers are licensed in all 50 states. Every UIG EVERDOME® cover includes expert design and engineering.
- **STANDARDS COMPLIANCE:** Our covers meet AWWA, API, NSF 61, NFPA, IBC, EPA, DIN, ISO, ASTM, OSHA, UBC Seismic, and other standards.
- **TRUSTED SOLUTION:** For over 55 years UIG has been focused on earning the trust of engineers, contractors and facility owners worldwide with skillful design and efficient installation on 1,000's of tank & cover projects.
