

Innovative water storage solutions designed to last

UIG TANK SYSTEMS has been a global leader in innovative bolted tank storage solutions since 1969. For over 55 years, we've been advancing tank design, manufacturing & construction, while setting the industry standard for quality, efficiency and service.

UIG EVERSTORE® Glass Fused-to-Steel Bolted Tanks are created through the fusion of two materials to achieve the best properties of each - the strength of Titanium-Rich Steel (TRS) and the protection of our highly flexible custom enameled surface.

Fused in a high temperature oven, EVERSTORE® panels form a new, chemically inert surface that is stronger than steel alone and resistant to rust, corrosion, abrasion and stains.

UIG leverages cutting edge techniques, and a state-of-the-art production facility to get quality materials to your jobsite faster than anyone else.

Pair a UIG EVERSTORE® tank with an EVERDOME® Aluminum Dome Cover for virtually maintenance-free storage with a 50+ year product lifespan.

FAST PRODUCTION AND SHIPPING ON EVERSTORE® BOLTED TANKS

EVERSTORE® TANKS ARE BUILT TO LAST

- Only UIG uses TRS™ Titanium-Rich Steel
- We source top-quality Grade 8 tank bolts
- We provide premium USS flat washers

CERTIFIED UIG DESIGN & CONSTRUCTION

- AWWA D103 design committee Member
- Engineers are licensed in all 50 states & Canada
- UIG construction teams are tested and certified

FAST PRODUCTION & DELIVERY

- State-of-the art production facility
- Industry-leading turnaround speeds
- Quick shipment to your job site

READY TO INSTALL ON YOUR SCHEDULE

- Dedicated project management teams
- Superior white glove service and support
- Seamless coordination & clear communication

INDUSTRIES EVERSTORE® SERVES

- **Hyperscale Data Centers:** Cooling water makeup and fire water tank systems
- **Municipal & Government Agencies:** Safe and reliable potable water storage
- **Food & Beverage Processing:** Hygienic solutions for production facilities
- **Energy & Utilities:** Secure storage for biogas, biofuels and wastewater treatment
- **Military & Defense:** Durable solutions for a wide spectrum of critical infrastructure
- **International Organizations:** Supporting global water initiatives around the world

THE UIG TANK SYSTEMS DIFFERENCE

- ✓ **UIG in-house engineering teams** are experts in tank, foundation & piping design
- ✓ **Certified UIG construction teams** deliver with precision, quality and efficiency
- ✓ **End-to-end project management** ensures a streamlined, hassle-free experience
- ✓ **A proven track record** rooted in consistent performance over the last 55+ years

EVERSTORE®

GLASS-FUSED-TO-STEEL BOLTED STORAGE TANKS

BENEFITS OF UIG EVERSTORE® GLASS FUSED- TO-STEEL BOLTED TANKS

UNMATCHED QUALITY:

- **TITANIUM-RICH STEEL (TRS™):** UIG tanks are made from Titanium-Rich Steel specifically developed for enameling applications to provide superior tensile strength, flexibility, and adhesion.
- **FACTORY CUT OPENINGS:** All tank openings, nozzles and bolt holes are laser-cut at the factory prior to the enameling process to ensure accurate fit and a quality finish.
- **INNOVATIVE PLATE EDGES:** Rounded edges on UIG's TRS™ plates allow for full encapsulation, ensuring maximum corrosion protection and tank longevity.
- **CUSTOM GLASS COATINGS:** UIG enamel frits are tailored for your application offering exceptional corrosion resistance from pH levels 2-13 and a wide spectrum of custom colors.
- **PRECISION ENAMELING:** We've perfected the wet spraying process to ensure uniform, durable application on all sheet surfaces and edges.
- **RIGOROUS TESTING:** Every finished panel undergoes comprehensive testing at the factory, adhering to the latest AWWA D103 standards and international requirements.
- **UNMATCHED DURABILITY:** Engineered to withstand harsh environments, UIG EVERSTORE® Glass-Fused-to-Steel Tanks offer superior corrosion resistance and ensure a longer lifespan vs. epoxy coated tanks.

VERSATILE & COST-EFFECTIVE:

- **EFFICIENT INSTALLATION:** Bolted tank design allows for quick and easy on-site assembly, reducing construction time and labor costs compared to welded tanks.
- **LOW MAINTENANCE:** With their enameled surface, UIG EVERSTORE® Tanks require minimal upkeep, leading to long-term savings and reduced operational disruptions.
- **MULTIPLE APPLICATIONS:** Ideal for water, wastewater and industrial storage. UIG EVERSTORE® Tanks serve a wide range of industries.
- **SCALABLE & EXPANDABLE:** The modular design allows for easy expansion or relocation, providing flexibility as your storage needs evolve.

INDUSTRY EXPERTISE:

- **DESIGN AND ENGINEERING:** UIG engineers are licensed in all 50 states and Canada. Every UIG EVERSTORE® tank includes PE stamped submittals and tank foundation design.
- **STANDARDS COMPLIANCE:** Our tanks meet AWWA, API, NSF 61, NFPA, IBC, EPA, DIN, ISO, ASTM, OSHA, UBC Seismic, and other standards.
- **TRUSTED SOLUTION:** For over 55 years UIG has been focused on earning the trust of engineers, contractors and facility owners worldwide with skillful design and efficient installation on 1,000's of tank projects.
